Declaration 1

Chemical products

Producer/Supplier:

Product name:
Area of application:

Criterion 4 – Excluded or limited substances and mixtures

4(a) – Hazardous substances and mixtures

Does the chemical product contain substances and mixtures which may be, or have been assigned the hazard statements or risk phrase listed on criteria document 4(a) or which meet the criteria for classification in the hazard classes or categories?

☐ **Yes**   ☐ **No**

If the answer is yes:

Which are the classified substances and mixtures (unambiguous chemical name and CAS-number) and what are their concentrations?

	Substance/Mixture	Hazard statement/Risk phrase	% weight by weight
1)	_____	_____	_____
2)	_____	_____	_____
3)	_____	_____	_____
4)	_____	_____	_____
5)	_____	_____	_____

Please note that the requirement 4(a) in the newsprint criteria document shall not apply to substances or mixtures which change their properties upon paper processing (e.g. become no longer bioavailable, undergo chemical modification), so that the identified hazard no longer applies.

Please give a scientific argumentation and proof, if you want to appeal to this clause.
Documentation can be sent as a separate copy.

4(b) – Substances listed in accordance with Article 59(1) of Regulation (EC) No 1907/2006

Are substances identified as substances of very high concern and included in the list provided for in Article 59 of Regulation (EC) No 1907/2006 present in mixtures, in an article or in any homogenous part of a complex article?

☐ **Yes**   ☐ **No**

If the answer is yes:

Which substances (unambigouos chemical name and CAS-number) and in what concentrations?

1) _____ _____ % weight by weight
2) _____ _____ % weight by weight
3) _____ _____ % weight by weight
4) _____ _____ % weight by weight
5) _____ _____ % weight by weight

The retention of the chemical in the final paper

The producer of the newsprint paper shall send the information of the used amount of the chemicals in the paper making process needed for the final assessment of requirements 4(a) and (b).

Please note that, in some cases, there is also a need to take into account the retention factor of the classified chemical, e.g., amount of the chemical which is retained in the final paper after the paper process.

Please send the scientific argumentation and proof to the competent body, if the retention of the chemical in the paper is considered to be less than 100 %.

Retention factor: _____ **%**
